

# Credicorp Flex risk note: Contract Mobilisation

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced risk note for directors weighing Credicorp Flex against cash reserves, supplier terms and the wider Credicorp product family.

A contract can require staff, stock or materials before the first payment arrives. Approval is never the point by itself; the useful test is whether the company can repay without creating the next gap.

Credicorp Flex belongs in the comparison when contract mobilisation creates repeated short gaps that should be drawn and repaid in cycles. If the same pressure repeats, pause and compare terms, reserves or a facility before using a one-off fix.

Keep the signed contract, purchase order and mobilisation budget together before drawing. The external links keep the page anchored to public material rather than sales copy.

For Credicorp Flex, the discipline is to draw for short needs and repay when receipts land, not to treat the limit as extra revenue.
