PRODUCT REPORT

# Credicorp Flex product-routing guide: Fleet Maintenance

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced product-routing guide for directors weighing Credicorp Flex against cash reserves, supplier terms and the wider Credicorp product family.

Fleet maintenance can stop revenue quickly when vehicles are essential to delivery or site work. The first check is whether the cost is dated, evidenced and likely to clear from a known receipt.

Credicorp Flex belongs in the comparison when fleet maintenance creates repeated short gaps that should be drawn and repaid in cycles. That means fixing the amount before comparing rates, fees or monthly comfort.

Track whether maintenance costs are one-off, seasonal or a sign the fleet needs replacing. The links below are the source checks used for this page.

For Credicorp Flex, the discipline is to draw for short needs and repay when receipts land, not to treat the limit as extra revenue.
