

Credicorp Flex report: recurring fleet maintenance

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

How transport and service businesses can compare a facility with emergency repair borrowing.

Fleet repairs rarely arrive evenly, but vehicles must keep earning. The decision is easier when the company writes down the invoice, the date and the repayment source.

Credicorp Flex may fit a rolling maintenance buffer better than repeated one-off loans. A clean use case has a specific cost, a specific business purpose and a specific repayment source.

Track whether the facility balance falls after busy periods. If it does not, pricing may need work. The sources below show the rule, product page or public register behind the point.

For Credicorp Flex, the discipline is to draw for short needs and repay when receipts land, not to treat the limit as extra revenue.
