Credicorp Flex product-routing guide: Late-payment Escalation

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced product-routing guide for directors weighing Credicorp Flex against cash reserves, supplier terms and the wider Credicorp product family.

Late customers create a finance question only after the company has also checked its right to chase and escalate. The first check is whether the cost is dated, evidenced and likely to clear from a known receipt.

Credicorp Flex belongs in the comparison when late-payment escalation creates repeated short gaps that should be drawn and repaid in cycles. That means fixing the amount before comparing rates, fees or monthly comfort.

Do not borrow on optimism. Chase the debt, document the expected date and price the fallback. The links below are the source checks used for this page.

For Credicorp Flex, the discipline is to draw for short needs and repay when receipts land, not to treat the limit as extra revenue.
