

## COMPLIANCE NOTE

# Credicorp Slice plain-English explainer: Business Data Security

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced plain-English explainer for directors weighing Credicorp Slice against cash reserves, supplier terms and the wider Credicorp product family.

Security work can become urgent after an audit, incident, insurer request or customer requirement. Treat the borrowing as a job to be done, not as extra revenue.

Credicorp Slice belongs in the comparison when business data security has become one supplier, adviser or service invoice that can sensibly be split. Compare the pounds repaid against the cost of waiting, delaying the supplier or missing the trade.

Spend against a named risk and keep evidence that the risk was reduced. The citations make the route auditable without copying source text.

For Credicorp Slice, start with the supplier invoice. If there is no defined bill to spread, it is probably the wrong route.
