Credicorp Slice cash-flow map: Trade Credit

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced cash-flow map for directors weighing Credicorp Slice against cash reserves, supplier terms and the wider Credicorp product family.

Trade credit is useful only when the company can meet the terms it accepts. A director should separate timing pressure from a weaker margin before choosing any finance route.

Credicorp Slice belongs in the comparison when trade credit has become one supplier, adviser or service invoice that can sensibly be split. The product fit comes from the shape of the cost, not from the page label.

Do not turn every supplier into a lender. Compare the cost of credit, late payment and a formal facility. Recheck the linked product and public-source pages before relying on the note.

For Credicorp Slice, start with the supplier invoice. If there is no defined bill to spread, it is probably the wrong route.
