

COMPLIANCE NOTE

Credicorp product comparison: Business Data Security risk note

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced risk note for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when business data security affects cash flow.

Security work can become urgent after an audit, incident, insurer request or customer requirement. Approval is never the point by itself; the useful test is whether the company can repay without creating the next gap.

Use the product comparison route when the company is still choosing between a fixed loan, a revolving facility and splitting one invoice. If the same pressure repeats, pause and compare terms, reserves or a facility before using a one-off fix.

Spend against a named risk and keep evidence that the risk was reduced. The external links keep the page anchored to public material rather than sales copy.

For the product comparison route, decide what shape the pressure has first: one dated gap, repeated draw-and-repay pressure, or one invoice to split.
