Credicorp product comparison: Open Banking Consent checklist

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced checklist for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when open banking consent affects cash flow.

Open Banking evidence can make cash-flow checks clearer, but consent and data use still need to be understood. A director should separate timing pressure from a weaker margin before choosing any finance route.

Use the product comparison route when the company is still choosing between a fixed loan, a revolving facility and splitting one invoice. The product fit comes from the shape of the cost, not from the page label.

Only use read-only consent that the business understands and can revoke. Recheck the linked product and public-source pages before relying on the note.

For the product comparison route, decide what shape the pressure has first: one dated gap, repeated draw-and-repay pressure, or one invoice to split.
