Credicorp product comparison: Premises Costs product-routing guide

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced product-routing guide for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when premises costs affects cash flow.

Premises costs can combine rent, rates, repairs and safety work in the same trading month. The first check is whether the cost is dated, evidenced and likely to clear from a known receipt.

Use the product comparison route when the company is still choosing between a fixed loan, a revolving facility and splitting one invoice. That means fixing the amount before comparing rates, fees or monthly comfort.

Check rates relief, valuation and safety duties before treating the whole pressure as borrowing. The links below are the source checks used for this page.

For the product comparison route, decide what shape the pressure has first: one dated gap, repeated draw-and-repay pressure, or one invoice to split.
