# Credicorp product comparison: Seasonal Forecasting checklist

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced checklist for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when seasonal forecasting affects cash flow.

Seasonal businesses can be profitable and still short of cash between buying and selling periods. A director should separate timing pressure from a weaker margin before choosing any finance route.

Use the product comparison route when the company is still choosing between a fixed loan, a revolving facility and splitting one invoice. The product fit comes from the shape of the cost, not from the page label.

Use conservative sales assumptions. A peak-season plan should survive an average season. Recheck the linked product and public-source pages before relying on the note.

For the product comparison route, decide what shape the pressure has first: one dated gap, repeated draw-and-repay pressure, or one invoice to split.
