Credicorp product comparison: Supplier Terms product-routing guide

By CM Beyer Commercial Research Desk - Commercial research editor - Updated 11 July 2026

A sourced product-routing guide for comparing Credicorp Loan, Credicorp Flex and Credicorp Slice when supplier terms affects cash flow.

Short supplier terms can leave good trade under pressure before customer cash arrives. The first check is whether the cost is dated, evidenced and likely to clear from a known receipt.

Use the product comparison route when the company is still choosing between a fixed loan, a revolving facility and splitting one invoice. That means fixing the amount before comparing rates, fees or monthly comfort.

Renegotiate terms where possible. Finance should support the trade cycle, not replace commercial discipline. The links below are the source checks used for this page.

For the product comparison route, decide what shape the pressure has first: one dated gap, repeated draw-and-repay pressure, or one invoice to split.
